AQAR!

This script is designed to deal with real estate. This helps users know the real estate available in the Kingdom of Saudi Arabia, specifically in Riyadh. This application provides its users with many distinct services and objectives that help them easily purchase and communicate with sellers.
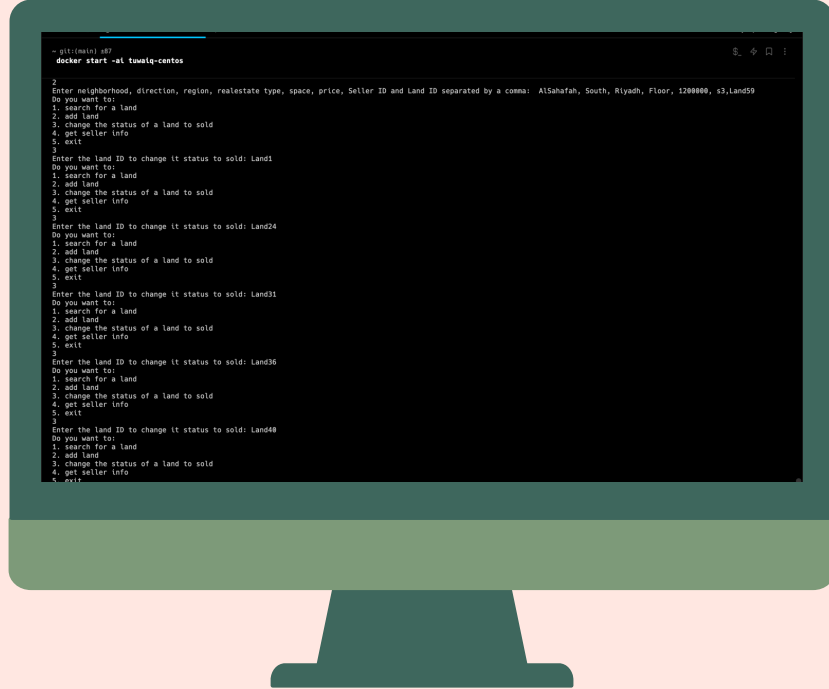

SCRIPT FEATURES

docker start -ai tuwaiq-centos

```
— git:(main) x87
docker start -ai tuwaiq-centos

[root@d126182627c8 Land]#
[root@d126182627c8 Land]# ./script.sh
